

## Specialty and Custom Chemicals Since 1968

### **E-SPERSE® 326** **PIGMENT DISPERSANT**

#### **PERFORMANCE BENEFITS**

E-Perse® 326, a nonionic with an HLB of 15.1, is designed for use with higher polarity pigments such as Blue 15:3 and some rubber carbon blacks. Good stability at a high pigment loading is one of the advantages this product offers.

E-Perse® 326 can be used in water-based packaging inks and other aqueous applications as well as in resinated systems.

#### **APPLICATION DATA**

Basic formulations should start at 10%-12% on total weight of pigment. For resinated systems 1-2%, is recommended. Optimization of the correct dosage level can be achieved by developing a ladder series for the pigment used.

#### **TYPICAL PROPERTIES**

Appearance:	Liquid
Ionic Nature:	Nonionic
Solubility:	Clear in water
Activity:	70%
