

C'ESTER J600

INCI: OLEYL ERUCATE

C'Ester J600 is based on long chain, unsaturated fatty acids and alcohols. This produces excellent skin care properties like preventing and protecting the skin from drying out. C'Ester J600 is easily spread on the skin and leaves a healthy oily film that is not absorbed too quickly. Can be used in combination with mineral oil or medium chain triglycerides to produce luxurious skin care systems. Suggested usage rate is 0.1-10% in the late oil stage of production to prevent breakdown of the Vitamin E content.

APPLICATIONS

Facial lotions & creams

Lip sticks

Body lotions

Hair conditioners

PROPERTIES

- Appearance.....Clear oily liquid
- Saponification Value.....105 max mg KOH/g
- Acid Value.....1.0 max mg KOH/g
